Technical support session for hardware and network professionals and any one who is fascinated with computers. It is an open session to share your ideas and experiences in computing industry. Run by the moderators from Corona technical support forum who strives to bring you the best in computing industry for the past ten years. Contribute your ideas and be an active member. We hope that the site will serve as the stepping stone to build a tech community where people are ready to impart their technologies and contribute their part towards a better IT community. We at 9847155469.com believes that talent is confident about their abundance and never hesitate to impart it.

Thank you once again for surfing through this pages. We hope a nice association with you for a long time.

Let the mind be in-charge than machines.

With regards
